PHARMA

Medical Devices & Cosmetics

|
Dermatology

Active ingredients : (SPRAY) Zinc oxide 5% +
Biolin P + Omega
(CREAM) Zinc oxide 5% + D-Panthenol+
Omega

Regulatory status: Cosmetic

Indication: Regular children's and infants' skin care, to prevent chafing and diaper rash and to relieve redness, particularly in the area where diapers adhere to the body.

Format: Plastic bottle gel 100/200 ml with atomiser. Plastic jar gel 75/125/250 ml.

Active ingredients : Ozone stabilized in oleic acid with Alpha Lipoic acid and vitamin E acetate

Regulatory status: Medical Device Class IIa

Indication: in the treatment of ulceration of skin - in the prevention and therapy of bed sores - in minor surgery - in prevention and treatment of radiotherapy ulcers

Format: 20ml bottle spray

Clinical study: Successful use of a topical mixture with ozolipoile in the treatment of actinic ulcers

Active ingredients: Polysiloxane

Regulatory status: Medical Device class I

Indication: Professional skin care of scars resulting from surgeries, burns, injuries, ulcers, acne. The gel lightens and smooths the scars.

Format: Gel plastic tube 10/15/20 g

made
in EU

Active ingredients: Hypochlorous acid (HOCl)

Regulatory status: Medical device class I

Indication: intended for skin hygiene, cleansing, care, and protection, helping to maintain an optimal environment for healthy skin. Even for children

Format: 60ml bottle

Active ingredients : Melatonin + vegetable oils + tocopherols

Regulatory status: Medical Device class I

Indication: Atopic skin. Eczema. Xerotic. Atopic dermatitis. Emollient and soothing in cases of itching and burning.

Format: 30 or 50ml Lipogel or 50ml spray

Active ingredients: Gluconolactone, Glycolic acid, Climbazole, Salicylic acid, Lactic acid, Vitamins A-E, Propylene glycol.

Regulatory status: Cosmetic

Indication: Daily treatment for seborrhoea and acne-prone skin.

Format: 40ml gel tube

Active ingredients: Stabilized urea + Omega Plus, SyriCalm , shea butter, silk proteins

Regulatory status: Medical Device class IIa

Indication:

- Intended for people with problems of excessive dryness of the skin (xerosis).
- Especially recommended for relieving the symptoms of dry skin of hands, subjected to frequent disinfection, washing with strong relieving and irritated by wearing of protective gloves.

Format: Plastic tube 100 ml

Active ingredients: Aminoacids, Keratin, Plantago, Salicylic acid, Aloe, Piroctone olamine, Zinc pyrithione, Zinc PCA, Serenoa, Urea, Caffeine, Melatonin, Quercus alba, Arginine

Regulatory status: Cosmetic

Indication: In case of hair loss.
High concentration of biorevitalizing and fortifying Active ingredients

Format: 60ml lotion

P H Δ R M Δ

Medical Devices & Cosmetics

Ear, Nose, Throat

Active ingredients: Tyndallised (non-viable) Lactocaseibacillus rhamnosus + Xylitol

Regulatory status: Medical Device class I

Indication: Probiotic barrier – protects and rebalances the oral mucosa.
Children over 3 years of age and adults

Format: Snap-on plastic bottle 30 ml with short or long atomiser.

Active ingredients: Nanocolloidal silver, Manuka MGO 400+ honey, Icelandic lichen, hyaluronic acid (spray) D-panthenol, essential oils (clove oil, eucalyptus oil, mint oil)

Regulatory status: medical device class IIa

Indication: The product is intended to help relieve symptoms of upper respiratory tract conditions, such as:

- inflammation of the throat and oral cavity,
- tonsillitis,
- sore throat,
- bacterial, viral, and fungal infections

Format: 16 lozenges

Active ingredients: Iceland lichen extract, Mallow leaf and linden flower extract, Hyaluronic acid

Regulatory status: Medical Device class I

Indication:

- Moisturises oral cavity, throat, vocal cords and larynx in cases of over-use of vocal cords.
- Use during pharyngitis, hoarseness and dryness in the throat, swelling and sore throat.
- Helps to reduce irritation and soothes dry and sore mouth and throat.

Format: Plastic bottle 125ml or glass bottle 125/200 ml

Active ingredients: N-acetyl cysteine, MSM, Isotonic solution 0,9% NACL

Regulatory status: Medical Device class I

Indication: Anatomical dispenser

Fan-shaped vaporisation for improved circulation to the mucous membranes

Format: 20ml

Active ingredients: Sodium Chloride, N-Acetyl-Cysteine, Xylitol, Colloidal, silver, Sorbitol

Regulatory status: Medical Device Class I

Indication: Persistent rhinitis and rhinorrhoea with yellow, green or brown mucus as sign of bacterial infection

Format: Nasal spray 20 ml

Active ingredients: thermal water, saline solution and six different API

Regulatory status: Medical Device Class IIa

Indication: nasal congestion, colds, allergies, or other respiratory issues in infants

Format: kit including Rinubes Nebuliser, Needle-cannula and 5ml Luer-lock Syringe

ENT - Medical Devices & Cosmetics

Active ingredients: Hypochlorous acid (HOCl)

Regulatory status: Medical Device Class IIa

Indication:

Intended for professional dental use as an irrigating solution for root canal procedures. It assists in reducing microbial load within the root canal system and supports the disruption of biofilms commonly associated with infected canals.

Format: 200 or 500ml bottle

Active ingredients : Isotonic sea water

Regulatory status: Medical Device Class IIa

Indication:

- Daily hygiene and cleaning of the nose and sinuses.
- Supportive during rhinitis, sinusitis and hay fever.

Format: APF/ snap-on plastic bottle 30/50 ml with atomiser. BOV aluminium spray can 50/100/150 ml with overprint + colourful applicator.

PHARMA Δ

Medical Devices & Cosmetics

|
Gastroenterology

Active ingredients : Macrolog 3350

Regulatory status: Medical Device class IIa

Indication: Chronic constipation
Recommended by the ESPGHAN and NASPGHAN guidelines

Format: 10 sachets if 10g

Active ingredients : Macrolog 4000 + Simethicone

Regulatory status: Medical Device Class IIa

Indication: Chronic constipation and excessive gastrointestinal gas production or bloating

Format: 30ml drinkable sticks

Active ingredients : Glycerol

Regulatory status: Medical Device class I

Indication: short-term treatment of occasional constipation. Glycerol exerts a mechanical laxative action due to drawing water into the stool, softening it and causing peristalsis and intestinal evacuation.

Format: Suppositories 2500mg adults, 1500mg children

Active ingredients : Glycerol, Honey, Chamomile, Hyaluronic acid and Mallow

Regulatory status: Medical Device Class I

Indication: indicated in the short-term treatment of occasional constipation. Glycerol moves and lubricates the fecal mass and facilitates its expulsion with an emollient effect.

Format: 6 microenemas for adults and children

Active ingredients: Low molecular weight hyaluronic acid, magnesium alginate (150mg or 500 mg), myrrh, guar gum

Regulatory status: Medical Device class IIa

Indication: Mild or Moderate Severe GERD. Barrier Effect on gastroesophageal tract, Helps heal mucosal damage, Soothing the mucous membrane, Ok for hypertensive or nephropathic patients

Format: (150mg/stickpack) or (500mg/stickpack) 12 or 24 liquid sticks

Even Pediatric

Active ingredients : Low molecular weight hyaluronic acid sodium salt, sodium alginate, Mhyrr e.s. tit. 30% polysaccharides, Simethicone

Regulatory status: Medical Device Class IIa

Indication: Moderate-Severe GERD. Reflux gas. Barrier effect on esophageal tract. Helps heal mucosal damage. Soothing the mucous membrane.

Format: Moderate Severe GERD 210 ml or 300ml bottle + dosing syringe

Even Pediatric

Active ingredients : Poloxamer, Sodium hyaluronate, Carbomer

Regulatory status: Medical Device class IIb

Indication: covers the damaged esophageal mucosa and creates a barrier protecting against the symptoms of gastroesophageal reflux; relieves symptoms such as heartburn, regurgitation of food into the esophagus and irritative cough. From 12yo children.

Format: 15 liquid sticks of 10g

In vitro studies: +91% better work of adhesion, X2 faster adhesion, +72% better adhesive strenght

Active ingredients : Activated charcoal + Simethicone

Regulatory status: Medical Device Class IIa

Indication: Double action on flatulence and bloating

Format: 20 bilayer tablets

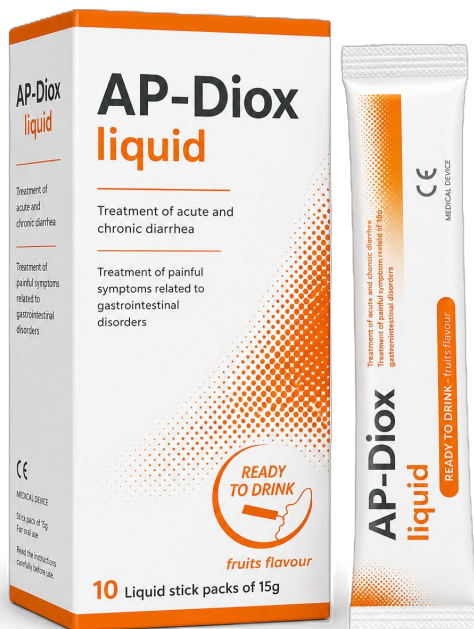

Active ingredients : 3g Diosmectite

Regulatory status: Medical Device class IIa

Indication: acute and chronic diarrhea

Format: 10 powder sachet of 3,25g

Active ingredients : 1,5g Diosmectite

Regulatory status: Medical Device Class IIa

Indication: Triple action: treats diarrhea, neutralized toxins and naturally restores gastrointestinal motility

Format: 10 liquid sticks of 15g

Medical Devices & Cosmetics

Gynaecology

Active ingredients : Colloidal Silver (with anti-pathogenic activity), Genistein (phytohormone that aids physiological vaginal secretion) and Hyaluronic Acid (bioadhesive polymer that protects and hydrates the vaginal mucosa)

Regulatory status: Medical Device Class I

Indication: vaginal dryness and postmenopausal vaginitis

Format: box of 6 disposable 5 g gel applicators

Active ingredients : Hyaluronic acid & lactic acid

Regulatory status: Medical Device Class IIa

Indication: vaginal dryness

Format: 5 disposable, plastic applicators 5 ml each

Active ingredients: Sodium hyaluronate, Magnesium citrate, Calcium piruvate, Lactic acid, Potassium citrate, Carnitine, Creatine.

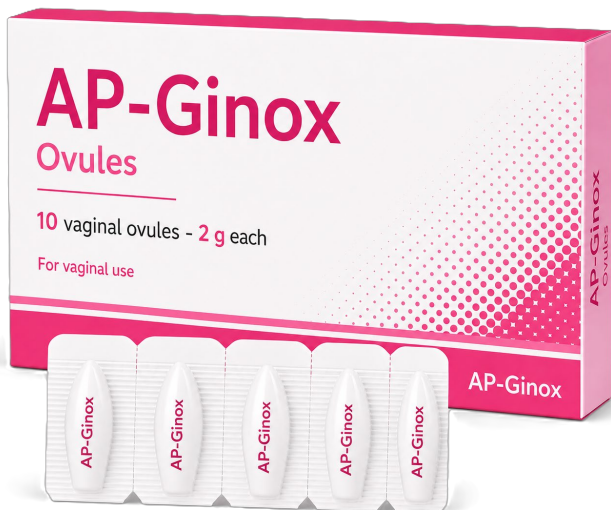

Regulatory status: Medical Device Class IIa

Indication: Increases the chances of conception. Makes the vaginal environment optimal for sperm viability and motility

Format: 6 gel applicators of 5ml

Clinical study: motility test in usage condition of AP - Ferti Gel in simulated vaginal environment

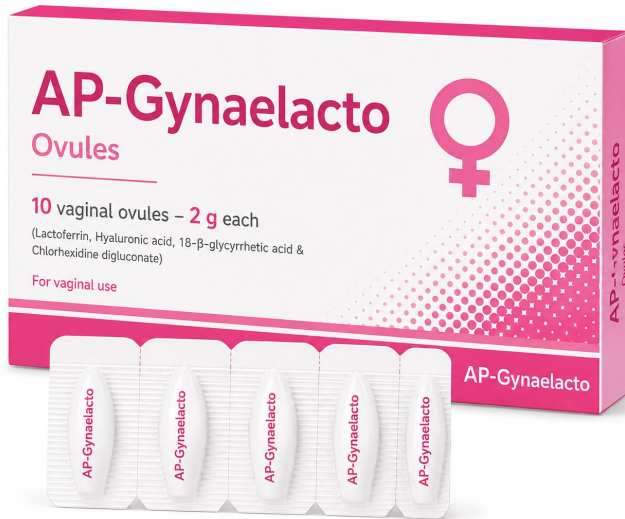

Active ingredients : Aloe, Ribes nigrum, Lavandula angustifolia, Sodium hyaluronate, Chamomilla recutita, Calendula officinalis, Lactic acid, Vitamin E, Vitamin A

Regulatory status: Medical Device Class IIa

Indication: Vaginal atrophy: Dyspareunia, yellow color discharge from the vagina, spotting or bleeding, itching

Format: Multidose tube • Single dose tubes

Active ingredients : Lactoferrin, Hyaluronic acid, 18-β-glycyrrhetic acid & Chlorhexidine digluconate

Regulatory status: Medical Device Class IIa

Indication: Treatment of mucosal dryness and support of the physiological processes of mucosal re-epithelialization caused by lesions of any origin and nature

Format: 10,7,5 vaginal ovules 2g

Active ingredients : Vitamin E, Borage, Almond, Currant and Triticum vulgare oils.

Regulatory status: Medical Device Class I

Indication: Protection, prevention and alleviation of breast cracks during breastfeeding and lactation period. Breast fissures. Irritation, itching and burning.

Format: Dermal spray

Active ingredients : Hyaluronic acid, Lactic acid, Polycarbophil, Tea tree oil, Vitamins A-E, Triglycerides

Regulatory status: Medical Device Class IIa

Indication: Healing and regeneration of the uterine cervix and vagina due to vulvar dystrophy therapy. Hydrating and lubricant. Vaginal dryness, irritations, itching, and burnings.

Format: 10 vaginal ovules 2g

Clinically tested: After 10 days of treatment: Dryness (-100%), Burning (-100%), Irritation (-90%), Pain (-88%), Itching (-100%), Intimate Odours (+84%).

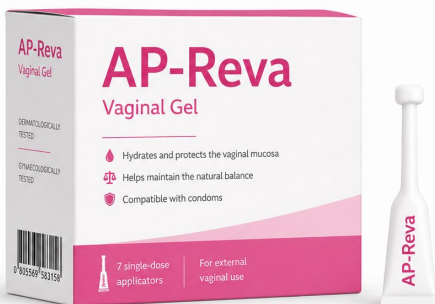

Active ingredients : Aloe, Ribes nigrum, Lavandula angustifolia, Sodium hyaluronate, Chamomilla recutita, Calendula officinalis, Lactic acid, Vitamin E, Vitamin A

Regulatory status: Medical Device Class IIa

Indication: Vaginal atrophy: Dyspareunia, yellow color discharge from the vagina, spotting or bleeding, itching

Format: Multidose tube • Single dose tubes

Clinically tested: After 2 weeks of treatment: Dryness (-50%), Burning (-80%), Irritation (-89%), Pain (-100%), Itching (-94%), Intimate Desires (+80%).

Active ingredients : Tyndallized Lactobacillus, Natural (Hydrolyzed/ Femented) mix milk protein, Lactic acid, FOS

Regulatory status: Medical Device Class IIa

Indication: Vulvo-vaginal atrophy. Protection against pathogenic microbotics such as Streptococci and Candida

Format: 10 vaginal ovules 1g

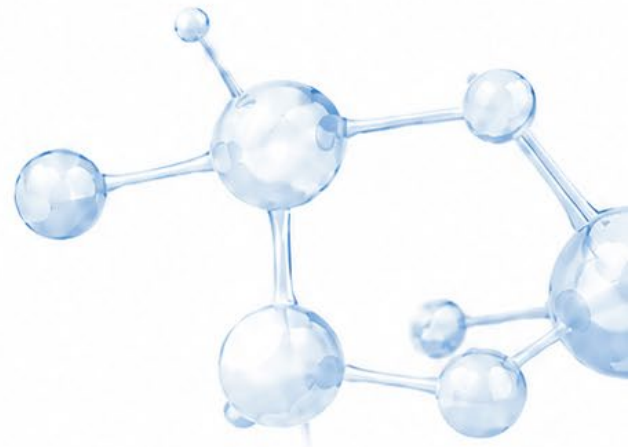

Active ingredients : hyaluronic acid and tyndalized lactobacillus acidophilus

Regulatory status: Medical Device Class IIa

Indication: contains tyndalized lactobacilli and hyaluronic acid that forms a film on the vaginal mucosa creating a mechanical barrier that prevents pathogenic proliferation and restore the correct vaginal microenvironment.

Format: 10 vaginal ovules 2g

Medical Devices & Cosmetics

Ophthalmology

Active ingredients : Polyhexanide

- Hexamidine
- Allantoin
- D-Panthenol
- *Lactobacillus Ferment*

Regulatory status: Cosmetic

Indication: Inflammation of the conjunctiva and eyelid margins of various etiologies, including bacterial, fungal, and viral infections.

- External sty (hordeolum) and chalazion

Format: 20 wipes pack

Clinical study on 70 people available

Active ingredients: Aloe Ferox Glycolic Extract, Malva Sylvestris Extract, Panthenol, Vegetable Glycerin

Regulatory status: Medical device class IIa

Indication: Cleaning and disinfectant wipes for the eye zone of sensitive and seborrheic eyelids and in the local treatment of blepharitis, calazio or orzaioli

Format: 18 sterile disposable wet wipes

Active ingredients: Aloe Ferox Glycolic Extract, Malva Sylvestris Extract, Panthenol, Vegetable Glycerin

Regulatory status: Medical Device Class I

Indication: Cleaning and disinfectant gel for the eye zone of sensitive and seborrheic eyelids and in the local treatment of blepharitis, calazio or orzaioi

Format: 15ml gel tube

Clinical study on 70 people available

Active ingredients: Hypochlorous acid (HOCl)

Regulatory status: Medical device class IIa

Indication: Cleanses, cares for, and protects the eyes and surrounding area.

Format: 60ml bottle spray

Active ingredients: Arnica + Hyaluronic Acid

Regulatory status: Medical Device Class IIa

Indication: Ocular irritation, burning, foreign body sensation, dryness and reddening, also after trauma

Format: 8ml multidose preservative free

Active ingredients: Ectoin 2% + Sodium Hyaluronate 0,1%

Regulatory status: Medical device class IIa

Indication: Ocular irritation, burning, foreign body sensation, dryness and reddening, also after trauma

Format: 10ml Nomelia

Active ingredients: Zink and Hyaluronic acid of High Molecular weight

Regulatory status: Medical Device Class IIa

Indication: Isotonic tear substitute for corneal protection, moisturizing and lubricating the eye, adjuvant during antiallergic treatments

Format: 8ml multidose Aptar preservative free

Active ingredients: Sodium hyaluronate 0.4%

Regulatory status: Medical device class IIa

Indication: Protect and moisturize the ocular surface in case of redness, burning and eye fatigue

Format: 10ml Novelia bottle

Active ingredients: Cross-linked Sodium Hyaluronate 0,1%, Sodium, Hyaluronate 0,1%, Mannitol, Sodium Chloride

Regulatory status: Medical device class IIa

Indication: symptoms associated with dry eye syndrome.

Format: 10ml multidose Novelia bottle, cap Aptar sterile preservative free

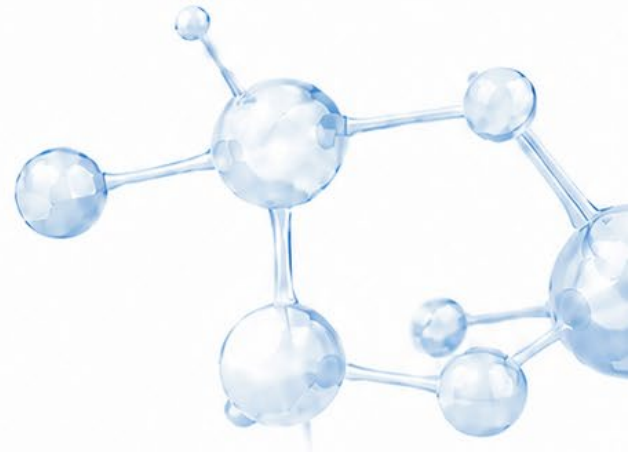

Active ingredients: Hyaluronic acid + Perilla

Regulatory status: Medical Device Class IIa

Indication: Isotonic tear substitute for corneal protection, moisturizing and lubricating the eye, adjuvant during antiallergic treatments

Format: 10ml multidose Aptar

Medical Devices & Cosmetics

**Osteoarticular &
musculoskeletal pain**

Osteoarticular - Medical Devices & Cosmetics

Active ingredients :

Hyaluronic acid sodium salt 2% (40 mg)
Hyaluronic acid sodium salt 2% (80 mg)

Regulatory status: Medical device class III

Indication: treatment of symptoms of human joint disorders such as osteoarthritis. 1 syringe at 6 months

Format: 2ml or 4 ml pre-filled syringe

Active ingredients: 40Mg HA+ 20Mg N-acetylglucosamine +20Mg Chondroitin Sulphate

90Mg HA+ 60Mg N-acetylglucosamine +60Mg Chondroitin Sulphate

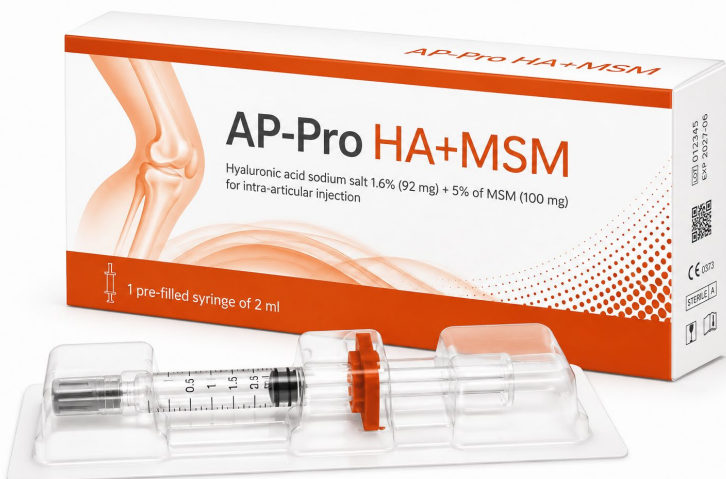

Regulatory status: Medical Device Class III

Indication: treatment of symptoms of human joint disorders such as osteoarthritis.

Format: 4ml prefilled syringe

Osteoarticular - Medical Devices & Cosmetics

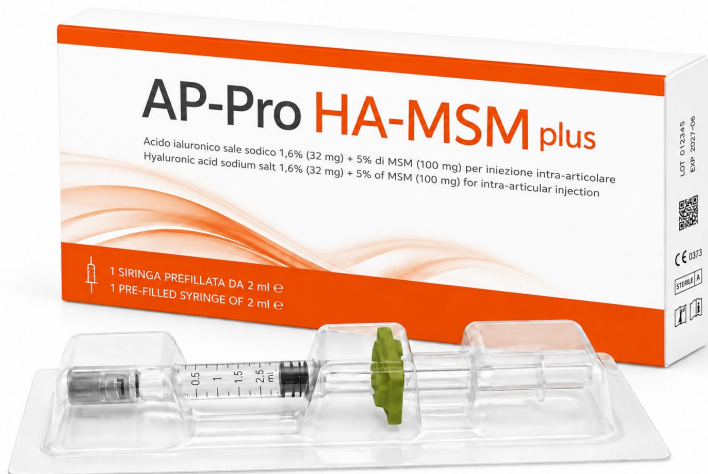

Active ingredients : Hyaluronic acid sodium salt 1,6% (32 mg) + MSM (Methylsulfonylmethane) 5%

Regulatory status: Medical device class III

Indication: Pain and impaired joint activity. Infiltration for hip, shoulder, knee and other joints. It is recommended to perform an initial cycle of 3 weekly treatments, possibly followed by maintenance sessions, according to the medical prescription.

Format: 1 pre-filled syringe of 2 ml

Active ingredients : Hyaluronic acid sodium salt 1,6% (48 mg) + MSM (Methylsulfonylmethane) 5%

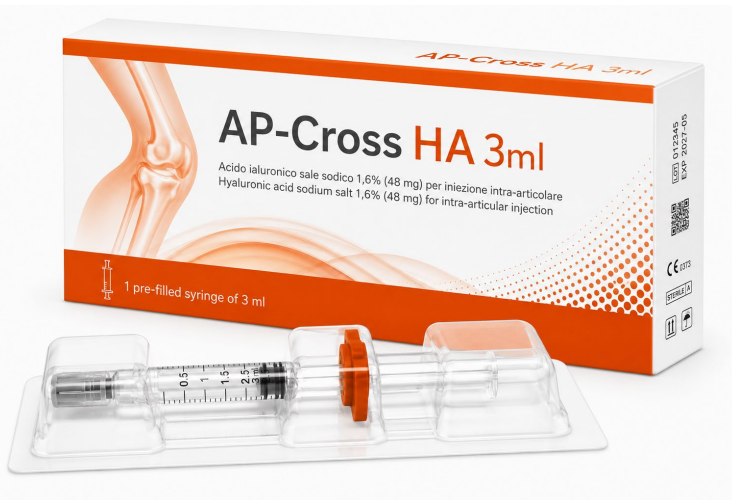

Regulatory status: Medical Device Class III

Indication: Pain and impaired joint activity. Infiltration for hip, shoulder, knee and other joints. It is recommended to perform an initial cycle of 3 weekly treatments, possibly followed by maintenance sessions, according to the medical prescription.

Format: 1 pre-filled syringe of 3 ml

Osteoarticular - Medical Devices & Cosmetics

Active ingredients : Cross-Linked Sodium Hyaluronate

Regulatory status: Medical device class III

Indication: treatment of symptoms of human joint disorders such as osteoarthritis. The product should be administered according to the frequency determined by the physician, according to the recommended frequency decision, such as 6-8-12 months.

Format: 1 pre-filled syringe
75mg/3mL 1 pre-filled syring
90mg/3mL

Active ingredients : Hyaluruonic acid + proline + glycin

Regulatory status: Medical Device Class III

Indication: Product is administered every 6 months. treatment of symptoms of human joint disorders such as osteoarthritis

Format: 2ml prefilled syringe
40mg HA+30mg L-proline+40mg Glycine+60mg NAG
90mg HA+45mg L-proline+60mg Glycine+90mg NAG

Osteoarticular - Medical Devices & Cosmetics

Active ingredients : Ozone stabilized in Oleic acid + others

Regulatory status: Medical device class I

Indication: Innovation in the treatment of acute and chronic pain of traumatic, osteoarthritic, and rheumatic origin

Format: 50g or 100g tube

Clinical studies available. Report on the efficacy of a specific topical medical therapy in patients with degenerative arthrosic disease

Active ingredients : Ozone stabilized in Oleic acid + others

Regulatory status: Medical Device Class I

Indication: Innovation in the treatment of acute and chronic pain of traumatic, osteoarthritic, and rheumatic origin

Format: 6 Liner with 2 patches each 8x6 cm

Clinical Evaluation of a Topical Patch for the Management of Acute and Chronic Osteoarticular Pain

Osteoarticular - Medical Devices & Cosmetics

Active ingredients : Menthol, Sodium chloride, Camphor, Eucalyptus globulus oil, Methyl salicylate, Simmondsia chinensis seed oil, Tocopherol.

Regulatory status: Medical device

Indication: Sensation of freshness with fast relief for traumas

Format: Plastic tube (100 ml)

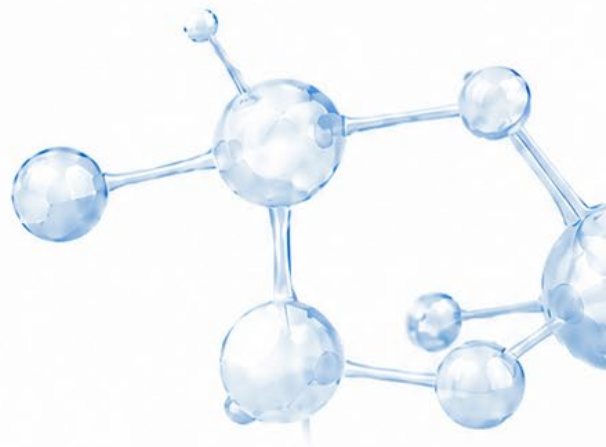

Active ingredients : Plant extracts, Camphor, Menthol, Mentha piperita oil, Azelaic acid, Bromelain, Sodium chloride

Regulatory status: Medical Device Class I

Indication: indicated in cases of localized trauma and contusions

Format: spray 100ml bottle + dispenser

Antioxidant and Detoxifying Dietary Supplement:

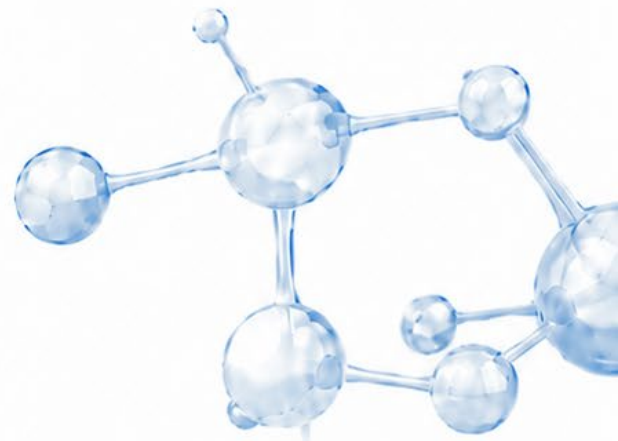

Water, Maltodextrins DE1, Acetyl-N-Cysteine-L, Magnesium Carbonate, Anhydrous Caffeine, Acidifiers: Citric Acid; Preservatives: Potassium Sorbate; Flavoring, Thickeners: Xanthan Gum; es Pilosella (0.06%), es Peppermint (0.05%), e.g Maqui (0.03)%, Sweeteners: Sucralose; Vitamin B3 (Nicotinamine)

NAC plays an important role in the body's detoxification processes. As a precursor of glutathione, it helps support liver detoxification and protects against toxins, drugs, and ethanol through its antioxidant activity.

Maqui is rich in anthocyanins and polyphenols, providing strong antioxidant and free radical-scavenging properties. It also contains Vitamin E and Vitamin B5, which help reduce tiredness and fatigue, support mental performance, and contribute to normal energy metabolism.

Pilosella promotes diuresis and supports the elimination of toxins, sodium, uric acid, and metabolic waste through the urine, enhancing the body's natural cleansing processes.

The synergistic action of NAC and Maqui helps detoxify and regenerate the liver, while Vitamin B1 contributes to neuroprotection and supports nervous system function.
